

# STICKERS, ADJUVANTS AND OILS

## **Lox Drift Control 2.5Gal**

Improves Application efficacy & Reduces Drift.

## **Peptoil 2.5 Gal**

Crop Oil Concentrate. Contains an anti-foam.

## **MES-100 2.5Gal**

Methylated Seed Oil. May use as a replacement for Non-Ionic Surfactants & Crop Oil. Improved Leaf penetration.

## **AMS Supreme 2.5Gal**

Ammonium ions for enhanced pesticide absorption. Increased droplet size reduces drift. Enhances herbicide activity by conditioning antagonistic Calcium ions present in spray solutions.

## **Sequestra OR Usurp 2.5 Gal**

Low use rate water conditioner designed to enhance performance subject to hard water. Easy to use formulation with excellent tank mix compatibility.

## **Surf AC 910 1Gal**

Non-ionic surfactant to enhance spray performance by a more uniform distribution. 90% surfactant provides excellent wetting and spreading. Contains anti foaming agents.

## **Grounded 2.5Gal**

Surfactant- Reduces Evaporation and Drift, improves droplet size uniformity, improves adsorption in soil, enhances application efficiency.

## **Dyne-Amic 2.5Gal**

Non-ionic surfactant. Excellent penetration of plant tissue, reduced evaporation, Excellent canopy deposition & spreading. Easier on crops than conventional crop oil concentrates.

## **LI700 2.5Gal**

Non-ionic penetrating surfactant. Reduces drift and spray water PH. Unique formulation technology and quality ingredients.

## **PAS800 1.25Gal**

Non-ionic surfactant and penetrant. Uniform coverage by decreasing surface tension of spray solutions. Can be used as an acidifier for mildly alkaline or acid water.

## **Exit 1Gal**

Activator -Adjuvant that is effective with water soluble and water insoluble agrochemicals. Increases surface activity of pesticides on the target crop. Greater absorption by the plant.

## **Nu-film P 1Gal**

Non-ionic spreader sticker adjuvant improves contact, wetting and adhesion of pesticides on the plant surface. Reduces effects of rainfall erosion, volatility, and UV degradation on pesticide spray deposits. NOP compliant for organic crops.

## **Protank Tank Cleaner Qt**

## **Foam Fighter Qt**

High Quality Low use rate spray tank De Foamer and Anti Foamer. FDA approved for food processing operations.

## **Fomekill Defoamer Qt (Special)**

Anti-foaming and defoaming agent used to control foam in agricultural sprays

## **Silkin 1 Gal**

Surfactant for water-based herbicide applications, pesticide & fertilizer application. Fast spreading, uniform distribution, and absorption.

## **Watermaxx Z**

Improves lateral movement of water increasing the horizontal reach of water, improves availability of water and nutrients to the plant and reduces water use,

## **Tactic 1Gal**

Combination of Surfactant & Sticker for best droplet retention on leaf surface. Prevents pesticide loss by sticking fungicides and insecticides to the leaf surface. Protects from rain and irrigation runoff

## **Cohere 2.5Gal**

Non- Ionic Spreader Sticker adjuvant. Water dispersible, excellent surface tension reduces wash off from light to moderate rain, heavy dew, or irrigation. No petroleum or vegetable-based oil.
