POULTRY MANURE-BASED ORGANIC FERTILIZERS

WHY POULTRY MANURE FERTILIZER?

Rich with high levels of macronutrients, nutrients (N-P-K) and crucial micronutrients, chicken manure-based fertilizers are a great comprehensive alternative to chemical fertilizers that safely improve the health of your lawn and garden soil.

By helping to improve overall soil structure, moisture retention and air circulation; it can be viewed not only as a highly effective fertilizer and plant food, but also as a very beneficial soil amendment.

Available in bags, totes and trailer load options

A Message from LICA

Long Island Cauliflower Association would like to thank you for your continued support and want to wish you and your community continued health and peace.

We have all faced some new challenges during this unprecedented time, but we will continue to serve our community as best we can. As you know, Long Island Cauliflower has an important role to play by continuing operations to best serve our community.

As we start our 124th year, our goal, as always, is to provide the finest quality products and services to our customers.

We are committed more than ever to the success and future of Long Island Cauliflower Association. John E. Bokina, Jr., CEO, and the board of directors, some of whom are descendants of our founders, and our dedicated staff look forward to continuing to grow and keep Long Island Cauliflower the #1 farm and garden center on Long Island.

Long Island Cauliflower has expanded its growing business and now has a beautiful garden and gift center.

Remember, shop local, shop small business, shop the best at Long Island Cauliflower Association.

ICE MELTS Selection

NEW! Cutting Edge® Pro PowerMelt+

Cutting Edge® Pro PowerMelt+ is a unique and effective ice melt blend infused with Calcium Chloride, Potassium Chloride, and Sodium Chloride using Patent Pending Breakthrough Infusion Technology.™

Rock Salt

Optimally screened for use in salt spreaders and to maximize coverage. Economical.

Frosty's Nightmare

Formulated to quickly de-ice pavement, driveways, and road surfaces. Sodium based mixed with liquid magnesium Chloride and molasses. Works quicker than Rock Salt, Potassium Chloride, or Urea. Works down to 0°F. Quality de-icer, does not leave a residue or attack cured concrete when used correctly.

Wicked Snow & Ice Melter

Mid to High grade blend. Contains CSM and added Calcium to kickstart the melting process, beneficial for dry cold weather. Popular in commercial market & retail. Melts down to -15°F. Safer on concrete and other surfaces when used as directed.

BLUE HEAT with Calcium Chloride Pellets

Considered to be one of the highest grade ice melters. It has enough Calcium Chloride Pellets to melt snow and ice down to 25 degrees below zero. In addition, it also has a slight blue tint. The blue tint lets consumers know where the product has already been applied thereby avoiding over-application. Blue-Heat does not chemically attack concrete and is safer to use than low grade ice melts.

Natural Ice Control

100% Organic made from natural beet juice with pure rock salt added. It is less corrosive, safer for children and pets, safer for vegetation. Saves you time and money and reduces salt use by 30%.

Calcium Chloride Pellets

It has been recognized by the industry as the most effective ice melter. It melts ice upon contact and is among the most powerful substances available today for melting snow and ice. Most De-icers become virtually ineffective once the temperature drops below 20 degrees while Peladow keeps on melting even at temperatures as cold as 25 degrees below zero. It is also safer to use and does not chemically attack concrete.

All Your Landscape Needs from One Source!

LebanonTurf is the only company that offers both microbiological components along with advanced controlled release fertilizer products delivered as part of an integrated "Best of All Worlds" system's approach to turf and plant care needs. We continue to explore and develop the industry's most advanced technologies to deliver the ultimate in efficient, cost effective lawn operations.

LebanonTurf offers ProScape and Lebanon Pro fertilizer and combination products in an easily and accurately applied granular product. In the ProScape brand you will find exclusive technologies such as Meth-Ex[®], a high efficient methylene urea and MESA[®], a specially formulated nitrogen that delivers brilliant color response. Lebanon Pro is a cost-effective blended fertilizer providing a practical approach in a wide range of lawn, landscape and general turf situations. Lebanon Pro contains LSN to ensure that nitrogen gets delivered to the turf and does not escape into the atmosphere through volatilization.

The ROOTS[®] brand of biologically enhanced nutrients merge nature and technology to offer leading edge solutions for turf and plant care. ROOTS provides an all-in-in nutrient delivery system that feeds the plant while enhancing the biological life of the soil and plant ecosystem and provides consistent color response, improved turf density and enhanced root mass.

LebanonTurf's selections of award-winning seed varieties have been chosen after careful research and development to deliver quality and performance.

INNOVATIVE SOLUTIONS FOR GREEN INDUSTRY PROFESSIONALS.

THREE GROUNDBREAKING HERBICIDES THAT PROVIDE DEPENDABLE POWER AND CONSISTENT VALUE.

QUINTESSENTIAL®

Unique, patent-pending formulation powered by H-Value™ Technology, a proprietary performance additive that increases efficacy. Get unrivaled performance in conditions that limit absorption - like untimely rains or irrigation - and improved crabgrass control, particularly in the challenging 3-5 tiller stage.

SUBLIME™

The one-of-a-kind, three-way power of Sublime gives you innovative, true broad-spectrum control. Its balanced blend of triclopyr, dicamba, and mesotrione delivers unsurpassed control of broadleaf weeds, from perennials to woody species as well as certain grassy weeds.

TRIAD T SELECT™

A popular tank mix now available in a convenient premix formulation. This proprietary amine formulation of Triad Select™ plus triclopyr provides powerful broad-spectrum, postemergence control of some of the toughest annual and perennial broadleaf weeds in a range of turf types.

Lawn and Commercial Mixes

PRICES MAY CHANGE WITHOUT NOTICE DUE TO COST AND AVAILABILITY.

LICA Elite Turf Mixture

This Elite mix was developed to respond well to a high maintenance schedule of grooming, irrigation, and fertilization. All varieties of Bluegrass are blue-tagged certified. This mixture features disease resistance and dark green color grasses for a "sod quality" lawn.

Seeding Rate: 4-6 lbs./1000 sq. ft.

- 25% Mazama Ken. Bluegrass
- 25% Sombrero Ken. Bluegrass
- 15% Longfellow Chewing Fescue
- 15% Appalachian Kentucky Bluegrass
- 10% Fiesta 4 Per. Ryegrass
- 10% Gator Cinco Per. Ryegrass

<u>5 lbs.</u>	<u>25 lbs.</u>	<u>50 lbs.</u>
\$29.25	\$121.85	\$196.80

LICA Sunny Mixture

Versatile, tough and attractive. This mixture will respond well to a medium to low maintenance schedule of fertilization and grooming, plus gives you drought tolerance where lack of moisture may be a problem. This mixture has excellent adaptability to various soil conditions as well as excellent disease resistance.

Seeding Rate: 6-8 lbs./1000 sq. ft.

- 30% Longfellow Chewing Fescue
- 20% Granite Ken. Bluegrass
- 20% Greenway Per. Ryegrass
- 20% Fiesta 4 Per. Ryegrass
- 10% Fielder Kentucky Bluegrass

<u>5 lbs.</u>	<u>25 lbs.</u>	<u>50 lbs.</u>
\$24.15	\$100.45	\$162.25

LICA Sun & Shade Mixture

The elite variety of Bluegrass, fine leaf perennial ryegrass, and red fescue that we have selected, will give you the combination of dark color, disease resistance, traffic tolerance, and shade tolerance that the quality conscious homeowner needs. This is an excellent mixture for most lawns on Long Island.

Seeding Rate: 4-6 lbs./1000 sq. ft.

- 25% Blue Velvet Ken. Bluegrass
- 20% Longfellow Chewing Fescue
- 25% Maxima Creeping Red Fescue
- 10% Gator Cinco Per. Ryegrass
- 10% Palmer III Per. Ryegrass
- 10% Clarinet Hard Fescue

<u>5 lbs.</u>	<u>25 lbs.</u>	<u>50 lbs.</u>
\$26.85	\$111.90	\$180.75

LICA Shady Mixture

We have blended shade tolerant elite Bluegrass and improved fine fescue with fine leaf perennial ryegrass for the best combination of shade tolerance and quick cover available. Because of the combination of shade tolerance and disease tolerance, this mixture will perform in environments where other lawn mixes just will not. This mixture will also do well in sandy, acidic soils or low maintenance areas.

Seeding Rate: 5-7 lbs./1000 sq. ft.

- 25% Maxima Creeping Red Fescue
- 25% Longfellow Chewing Fescue
- 20% Shining Star Per. Ryegrass
- 15% Clarinet Hard Fescue
- 15% Blue Velvet Ken. Bluegrass

<u>5 lbs.</u>	<u>25 lbs.</u>	<u>50 lbs.</u>
\$26.40	\$110.10	\$177.75

\$135.00	\$224.90

Forage Mixtures

KING'S HORSE SUPREME

Forage type Kentucky Bluegrass gives this mix excellent longevity and dense cover. Paddock meadow brome and grazing tolerant orchardgrass add drought productivity while the diploid ryegrass gives it a quick start and excellent spring and fall production.

Seeding Rate: 25 to 30 lbs/Acre

37% Grazing Tolerant Orchardgrass
20% Montana Meadow Brome
20% Diploid Perennial Ryegrass
15% Balin Kentucky Bluegrass
6% European/Premium Timothy
2% Dutch White Clover

33 LBS. \$225.65 per bag

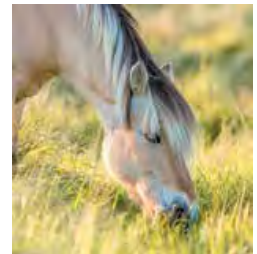

Paddock EX Mix

Paddock EX was created with grass species which are very tolerant to the traffic pressure of equine, cattle and other livestock, and will persist under heavy utilization. Optimal performance depends on adequate hay and appropriate paddock rest periods. All forages are endophyte-free.

Seeding Rate: 50-75 lbs./Acre

65% Atlas Tall Fescue
20% 8/85 Kentucky Bluegrass
15% Boreal Creeping Fescue

33 LBS. \$158.50 per bag

Great Gains Northern Mixture

Is the only proven High-Sugar Grass mixture formulated for progressive US cattle operations. High Sugar Grasses are extremely drought and cold tolerant. Its pasture will regenerate each year — even after difficult weather conditions. The increased sugar levels occur naturally, and do not require extra fertilizer. The naturally quick growth rate of HSGs crowd out weeds and reduce the need for herbicides even on heavily grazed paddocks.

Seeding Rate: 10-15 lbs./Acre

<u>25 lbs.</u>	<u>50 lbs.</u>
\$162.50	\$275.00

Pasture Perfect Show Horse

It is a mix of highly palatable varieties that make super quality forage. Excellent season long forage. Can also be used for hay.

Seeding Rate: 35-50 lbs/Acre

40% Tekapo Orchard Grass
5% Tuukla Timothy Bluegrass
5% Ken-Blue Bluegrass
30% Duo Festulolium
20% Tonga Tetraploid Ryegrass

<u>25 lbs.</u>
\$115.50 per bag

Forage Mixtures

Rackmaster Trophy Radishes

Establishes and grows fast producing up to 5,000 lbs. per acre dry matter of lush green top growth and another 2,000 lbs. per acre of edible root mass - both of which deer find highly attractive. To attract and provide nutrition for deer. To build soil organic matter and improve soil tilth.

Seeding Rate: 10 lbs./acre (1/4 lb. per 1000 sq.ft.) alone or 3-5 lbs./acre (1-2 oz. per 1000 sq.ft.) in mixtures.

5 lbs.
\$44.00

Rackmaster Chicory

Is a blend of high yielding perennial forage chicory varieties that supplies a highly palatable, high protein and energy rich food source for deer and other wildlife throughout the spring and summer months and into fall.

Seeding Rate: 10 lbs./acre alone (4 oz./1000 sq.ft.) or 4 lbs. per acre in mixes (1.5 oz./1000 sq.ft.) or 2-1/2 lbs. per 1000 sq.ft.)

5 lbs.
\$57.75

Rackmaster Fall Deluxe Deer Mixture

Is a combination of winter annual grasses, legumes and brassica species that attract deer and provide the carbohydrates needed to help the deer herd build up stored fat to maintain good body condition through the rut and winter stress period. Also provides excellent habitat for quail and turkey. It features RapidResults seed germination enhancement technology which promotes quicker emergence and stronger, deeper root growth.

Seeding Rate: 100 lbs./acre or 2-1/2 lbs. per 1000 sq.ft.

50 lbs.
\$52.50

Rackmaster Deer Greens

Is a 100% mixture of brassicas including rape, purple top turnip, kale and Trophy Radish that provides an abundant high protein and energy rich diet for deer. It germinates quickly to provide an immediate high protein food source to help fill seasonal nutritional gaps.

5 lbs.
\$40.75

Rackmaster Deer Grazer

Is a mixture including rape, purple top turnip, Trophy Radish and crimson clover that provides an abundant high protein and energy rich diet for deer. It germinates quickly to provide an immediate high protein food source to help fill seasonal nutritional gaps.

Seeding Rate: 5 lbs per 1/2 acre or 10 lbs. per acre or 1/4 lb. per 1000 sq.ft.

5 lbs.
\$40.75

Rackmaster Supreme Fall

Is a custom blend of highly succulent and nutritious winter annual grains, brassica, winter peas and annual clovers designed to attract and provide the nutrition needed by the entire deer herd for maximum growth and optimum health.

Seeding Rate: 100 lbs./acre or 2-1/2 lbs. per 1000 sq.ft.

50 lbs.
\$52.50

AccuBlu™

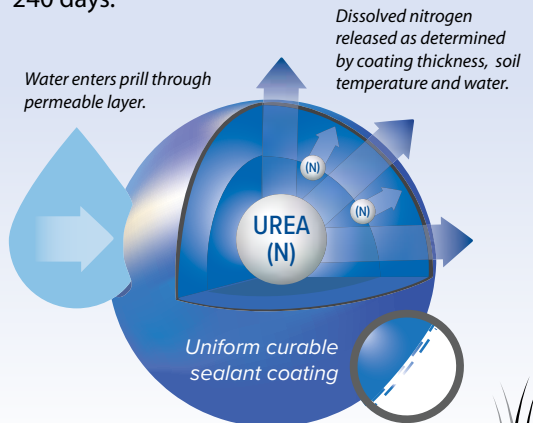

CONTROLLED RELEASE NITROGEN

AccuBlu™ is a patented, coated, controlled-release PCU nitrogen source designed to provide a reliable and predictable source of nitrogen over a specified length of time.

- Precise technology – A patented uniform curable sealant coating providing predictable release over a specified time period. Nutrient release from 45 to 240 days.
- Superior technology – Uniform curable sealant coating allows for a metering of the nitrogen to the plant over the desired time frame as compared to the catastrophic release of SCU.
- Supports and exceeds the BMP recommendations and the 4R Nutrient Stewardship program – right source/right rate/right time/right place.

How it works

Uniform curable sealant coating allows for a predictable metering of nitrogen to the plant over the desired time frame from 30 to 240 days.

Cut and Wildflowers

PRICES MAY CHANGE WITHOUT NOTICE DUE TO COST AND AVAILABILITY.

Bachelor Button

FS-BB-BA: Sometimes referred to as a Cornflower. A drought tolerant annual, grows 2 to 3 feet tall. Prefers full sun in various soil types. An outstanding performer for cutting or admiring.

1 oz	1/4 lb	1-4 lbs
\$3.15	\$5.50	\$17.15/lb

Royal Mix - Sweet Pea Seeds

Truly an old-fashioned flower, sweet peas have been cultivated since the 1800's. Exceptional fragrance. Large 2" blossoms in bright, clear colors of red, purple, mauve, pink, blue, and white. Blooms over a long period with exceptional fragrance.

1/4 oz	1 oz	1/4 lbs
\$3.15	\$8.85	\$35.40

Cosmos Mix

FS-CO-MX: A hardy, erect annual requiring very little moisture once established. The attractive flowers are a mixture of stunning deep crimson, soft pink which can grow to be 2 to 3 feet tall. Requires full sun.

1 oz	1/4 lb	1-4 lbs
\$3.15	\$5.45	\$21.75/lb

Corn Poppy Red

FS-PA-RR: Annual flower, they are 2 to 2½ feet in height. The large 2 to 4 inch blooms are fire engine red. Prefers well-drained soil in full sun to partial shade. Performs best if sown in early spring in the northern regions.

1 oz	1/4 lb	1-4 lbs
\$3.15	\$8.85	\$31.40/lb

Cosmos White

FS-CO-WH: A hardy, erect annual requiring very little moisture once established. The attractive flowers are pure white which can grow to be 2 to 3 feet tall. Requires full sun.

1 oz	1/4 lb	1-4 lbs
\$3.15	\$6.30	\$25.75/lb

Norlin Blue Flax

FS-WF-FL: They are 12 to 14 inches high. Numerous light blue, cup-shaped flowers bloom well into the summer. Prefers dry, full sun areas in light sandy soil. Flowers last only a single day..

1 oz	1/4 lb	1-4 lbs
\$3.15	\$11.20	\$44.30/lb

Marigold Crackerjack

FS-MA-CRAC: Annual. Height 2½ to 3 feet. Very popular large flowering variety. Large flowers average 4 inches in diameter. Flowers range in shades of yellow, gold and orange. Ideal for garden color or as cut flowers.

1 oz	1/4 lb	1-4 lbs
\$3.15	\$6.00	\$17.50/lb

Black Eyed Susan

No summer garden is complete without the bright, cheerful splash of color of Black-Eyed Susan. This 12-36 inch tall plant is versatile, drought-tolerant and easy- to-grow variety illuminates the landscape with golden blooms. It is a native plant and will attract pollinators to the garden or meadow all summer long.

1 oz	1/4 lb	1-4 lbs
\$3.15	\$6.00	\$17.50/lb

Nasturtium (Jewel)

FS-NA-NAST/JEWLB: A low bush or trailing plant 8 to 12 inches tall. Trailing plants may extend almost a yard. Leaves are bright green and rounded and the bright flowers come in several colors. Nasturtiums are an attractive and nutritious addition to salads, as the flowers are edible.

1 oz	1/4 lb	1 lb
\$3.15	\$6.50	\$15.65/lb

Balsam 'Bush Mix' Impatiens

FS-PA-ICE: Balsam 'Bush Mix' is unique in having flowers form at the top of the plant, instead of along the stem. It grows 16 to 24 inches tall and has mostly double flowers in shades of rose, salmon, white, scarlet and violet.

1 oz	1/4 lb	1 lb
\$3.15	\$7.50	\$28.95

Sunflowers

PRICES MAY CHANGE WITHOUT NOTICE DUE TO COST AND AVAILABILITY.

Mammoth Grey Stripe

Bright, golden-yellow flowers up to 10" across. Attracts birds. Each plant produces one flower. Great-tasting seeds for roasting and snacking. Height: 72 to 84".

1 oz	1/4 lb	1 lb
\$3.15	\$6.80	\$27.20

Autumn Beauty

Bold, beautiful flowers up to 8" across. Bright yellow, bronze, and purple shades with some bicolor. Multi-branching; produces many long stems. Height: 60".

1 oz	1/4 lb	1 lb
\$3.15	\$6.60	\$26.45

Lemon Queen

Abundant lemon yellow flower. 6" blooms. Dark centers. Height: 5".

1 oz	1/4 lb	1 lb
\$4.05	\$16.15	\$64.65

Soraya

It has larger flowers and thicker, sturdier stems. Tangerine petals, dark center. Branches average 20" and sport 4" to 6" blooms. May yield as many as 20 to 25 stems/plant.

1/16 oz	1/4 oz	1 oz	Bulk
\$3.75	\$15.05	\$60.35	M=TBD

Ring of Fire

Single petal develop dark red around the base of each; yellow tips with a dark center; disc 5" to 6" in size. Branching. Height: 40 to 50".

1/16 oz	1/4 oz	1 oz	Bulk
\$3.15	\$8.35	\$33.35	M=TBD

Teddy Bear

The final height depends on the size of the container. Expect 8 to 12" plants from seeds directly sown in a 4" pot. This branching variety will host 3 to 5" sunny, shaggy blooms. Height: 8 to 12" in containers; 35 to 42" in garden.

1 oz	1/4 lb	1 lb
\$3.70	\$14.85	\$26.90

Sunspot

One of the easiest flower seeds to grow, are great for containers and flower beds, and they only reach 24 to 36" tall with an average sized single 10" head.

1 oz	1/4 lb	1 lb
\$3.75	\$14.90	\$59.60

Velvet Queen Sunflower

Deep velvety crimson blooms accented with traces of yellow around a black center. The plants are free branching, bearing lots of 5-6" blooms that are lovely for cutting. Can reach height of 5' tall.

1 oz	1/4 lb	1 lb
\$4.05	\$16.15	\$64.65

Dwarf Sungold Sunflower

This unique Sunflower has an extremely soft texture and is truly a fun statement in the garden. A shorter variety, is perfect for the border of the garden and makes fabulous cut flowers. Can reach height of 24-36" tall.

1 oz	1/4 lb	1 lb
\$3.15	\$7.75	\$30.90

Sunrich Series

Long considered the industry standard, the Sunrich varieties are ideal for cutflower production because they are pollenless and non-branching. When spaced 6" apart, flowers will grow to 5" to 6" in diameter on mid-height plants. Day length neutral. Matures in approximately 65 to 70 days.

CAROVAIL

Healthy Plants, Healthy Soil, Healthy You

We've got your crops covered.

Broad-spectrum, preventive, fungicide with multiple modes of action for every phase of production. Disease control for:

- Black Rot
- Botrytis
- Phomopsis

Contains a bacterium that activates the plant's natural immune defenses, helping combat a wide variety of diseases, including:

- Downy Mildew
- Powdery Mildew
- Sour Rot

A preventive fungicide that uses multiple modes of action to block fungal and bacterial pathogens while activating crops' natural defenses.

- Phytophthora
- Pythium

A copper-based fungicide that provides effective control of fungal diseases, including:

- Black Rot

Ensure Transplant Success with Bio-tone® Starter Plus

FOUR GENERATIONS OF PROVEN RESULTS

Professionals have been feeding and maintaining gardens with Holly-tone® and Plant-tone® for decades. Now they know the best way to boost root growth and ensure transplant success is by starting with Bio-tone® Starter Plus. An all natural fertilizer fortified with beneficial microbes, humates, and mycorrhizae, Bio-tone Starter Plus helps roots establish faster, grow deeper, and resist stress. Eliminate expensive callbacks due to plant loss by using Bio-tone Starter Plus for everything you plant.

Espoma. A family tradition since 1929.

Where Ag Innovations Grow

Providing Solutions. Exceeding Expectations.

From planting to harvest and every stage between, it takes the right production partner to build a better program. Helena Agri-Enterprises, LLC brings agronomic information, product recommendations, and precision technology to farms across the United States. At Helena, we understand no two fields are the same. That's why wherever crops are grown, Helena is there.

JMS Stylet-Oil®

The Clear Choice for Powdery Mildew and Mite Control

JMS Stylet-Oil – an effective alternative to early-season sulfur treatment.

Multi-Functional – serves as an eradicant, preventative and anti-sporulant when treating powdery mildew.

Mite Control – early-season use provides consistent mite control and early-season advantages over sulfur.

Product Purity – organically enhanced clean white oil; guaranteed purity for maximum effectiveness.

Champ[®] Formula 2 Flowable

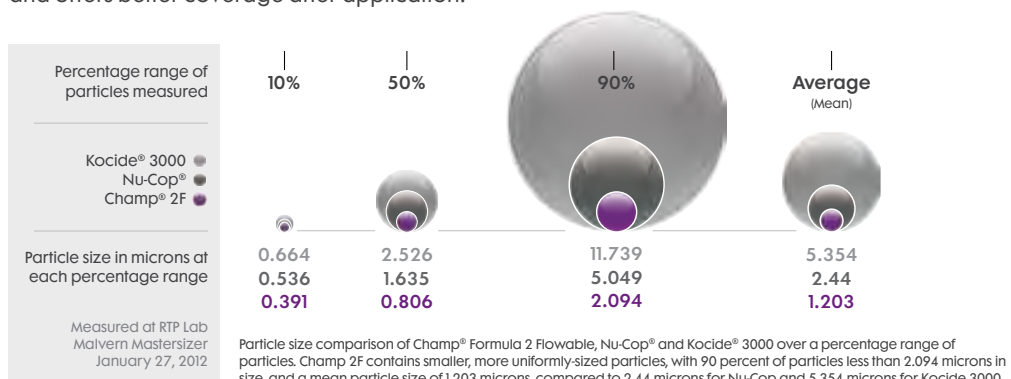

NEVER SETTLE FOR LESS.

BETTER COVERAGE.

The key to disease control with copper is coverage – the more uniformly and completely leaf surfaces are covered, the better the performance. Champ[®] Formula 2 Flowable contains more precisely-sized particles, and more of them. Over 90% of the particles in Champ Formula 2 Flowable are 2.094 microns or less; the optimal size range to cover leaf surfaces and maximize disease control.

PARTICLE SIZE COMPARISON.

The smaller particle size of Champ Formula 2 Flowable helps maintain suspension during storage and offers better coverage after application.

BETTER STORAGE AND MIXING PROPERTIES.

We've spent three years refining the blend of polymers, surfactants and other inerts to perfect an easy-flowing, fast mixing formulation. In extreme condition tests, Champ Formula 2 Flowable, stored for more than a year at temperatures that vary weekly from 5° to 105° F, still mixes and pours like the day it was formulated. No other flowable copper can do that. And once it's time to use Champ, it 'blooms' instantly and mixes uniformly with minimal agitation.

Champ Formula 2 Flowable formulation easily disperses with mild agitation.

Grow a better tomorrow

The Advantage of TWO Powerful Products

ProBlad® Verde is the first organic fungicide providing locally systemic/translaminar activity and extended duration of control that provides disease prevention and is an excellent curative option.

Cinnerate has been used on grapes for the past 12 years in the PNW providing excellent disease curative control plus mite and insect management while being soft on the crop and beneficial predators.

BENEFITS of using ProBlad Verde & Cinnerate in your fungicide program:

- No phytotoxicity concerns when the daytime temperature exceeds 85 degrees (when applied during the cooler time of the day)
- Excellent curative activity for powdery mildew, botrytis, downy mildew
- Safe to tank mix with other pesticides, fertilizers, and adjuvants
- No effect on wine quality at all application timings
- MRL Exempt & OMRI Listed
- Caution Signal Word

Preventative Program ProBlad® Verde 32-45 oz/acre	Curative Program Cinnerate 32 oz/100 ga
<p>Additional benefits with ProBlad Verde:</p> <ul style="list-style-type: none"> • Able to provide curative control of existing infection and preventative control on a 14-day interval, whereas <i>Bacillus</i> products require a 7-day interval to achieve similar results • <u>Locally systemic and translaminar</u>; Active Ingredient will move through the leaf to the opposite side to provide additional control and prevention • Better fruit protection: ProBlad absorbs into treated fruit and provides superior disease prevention & duration of control • Can be substituted into a 14-day conventional fungicide rotation without sacrificing efficacy <p>FLEXIBLE APPLICATION - 4-HOUR REI - 1-DAY PHI LOCALLY SYSTEMIC - CURATIVE & PREVENTATION - MRL EXEMPT UP TO 7-14 DAYS PROTECTION</p>  	<p>Additional benefits with Cinnerate:</p> <ul style="list-style-type: none"> • Cleans up existing infection more effectively than other eradicates • Curative control superior to Kaligreen and Oxidate • Tank mix flexibility, can tank mix with conventional fungicides • Added benefit of mite, thrip, leaf hopper and mealy bug control <p>IPM COMPATIBLE - 0-HOUR REI 0-DAY PHI - MRL EXEMPT</p>

Field Corn Types

PRICES MAY CHANGE WITHOUT NOTICE DUE TO COST AND AVAILABILITY.

SCS 864Q

Days: 86

- Strong yield potential
- Good roots and drought tolerance
- Strong disease tolerance to Northern Leaf Blight
- Medium Statured, good stress emergence for difficult soils

SCS 1018AMX

Days: 101

- Outstanding drought tolerance W/Aquamax
- 101 RM Replacement for SCS 1017 W/10+ Bu/Acre yield advantage
- Excellent grain quality: Food grade potential
- Exceptional Plant Health and Staygreen

SCS 1042Q

Days: 104

- Yield leader in maturity
- Good Northern Leaf Blight Tolerance
- Excellent silage yield & digestibility
- Hybrid meant for the eastern corn belt
- AQUAmax

SCS 1055PCE

Days: 110

- Widely adapted hybrid
- Good Grey Leaf Spot tolerance
- Good roots & stalks
- Good Staygreen & attractive fall appearance
- Medium-tall plant stature w/ lower ear placement

SCS 1071Q

Days: 107

- High yield potential hybrid
- Above average test weight
- Solid agronomic package against Eastern Diseases
- Below Average Plant Height
- Excellent Stress Emergence

SCS 1084AM

Days: 108

- Leader Hybrid for the Eastern Corn Belt
- Very good Grey Leaf Spot tolerance & good Northern Leaf Blight Tolerance
- Moderate statured plant w/strong roots & good stalks
- Very good staygreen & excellent eye appeal at harvest
- Very good NCLB & Good GLS tolerance

SCS 1094PCE

Days: 109

- Tremendous top end yield w/ good stability
- Moderate plat stature & ear height
- Good roots & silks early for maturity
- Good Northern Blight & moderate Grey Leaf Spot tolerance
- Dual purpose Hybrid with good silage yield & digestibility

SCS 1122Q

Days: 111

- Impressive eastern performance
- Works with all soil types
- Very good plant health & late-season intactness
- Very good drought tolerance
- Very good NCLB & Good GLS tolerance

SCS 1154Q

Days: 115

- Full season leader hybrid combines consistent high yields with good agronomics.
- Dependable drought tolerance
- Performs well across the corn belt
- Good roots and stalks
- Food grade grain quality, good Northern Leaf Blight & good gray Leaf Spot tolerance

CONVENTIONAL

SCS 1042

Days: 104

- Yield leader in maturity
- Good Northern Leaf Blight Tolerance
- Excellent silage yield & digestibility
- Hybrid meant for the eastern corn belt
- AQUAmax

AM - Optimum® AcreMax® Insect Protection system with YGCB, HX1, LL, RR2. Contains a single bag integrated refuge solution for above-ground insects.

AMXT - Optimum®, AcreMax®, Xtreme. Single Bag integrated refuge solution for above and below ground insects. Contains Agrisure® RW & Bt Trait and Herculex® XTRA genes.

PCE - Powercore® Contains Hx1, VTP, ENL, LL, RR2. Contains integrated refuge solution for above ground insects.

Q - Qrome® Single bag integrated refuge solution for above and below ground insects. Contains Agrisure® RW & Bt Trait and Herculex® XTRA genes.

Bi Color Corn Seeds

PRICES MAY CHANGE WITHOUT NOTICE DUE TO COST AND AVAILABILITY.

Takeoff

69 days. This high quality, augmented yellow offers excellent field holding ability, and excellent yield potential. Large 7 ¾ 8.5" ears are produced on clean, sturdy 6' plants. The ears fill well to the tip with 16-18 rows of bright deep yellow kernels. The ears are tightly covered with an attractive, deep green husk and excellent flags. Isolation required.

<u>1/4 lb</u>	<u>1 lb</u>	<u>1 M</u>
\$12.79	\$50.75	\$11.85

Latte

68 days. Is an early maturing synergistic bicolor that has outstanding quality for an early variety. This early hybrid has good cold soil performance with the sweetness, tenderness and flavor of many main season varieties. Its 5'8" plant sets the 7½ to 8" ears at 20" and has intermediate resistance to rust and Stewart's Wilt.

<u>1/4 lb</u>	<u>1 lb</u>	<u>1 M</u>
\$10.65	\$42.59	\$15.46

Montauk

79 days. Large, sweet ears. Has become a grower favorite for its girthy, eye-appealing 8" ears, outstanding eating quality, and very high yield potential. An exceptional husk package with dark green flag leaves covers the tip well, and ears snap easily off the 6½ to 7' clean and sturdy plant. The cylindrical ears are filled well to the tip with 16 to 20 rows.

<u>1/4 lb</u>	<u>1 lb</u>	<u>1 M</u>
\$11.56	\$46.24	\$15.63

Cuppa Joe

74 days to maturity. Is a synergistic bicolor with great quality and extremely high yield potential. It has good cold soil tolerance and produces well filled, large 8 to 8½" ears with 14 to 16 rows of yellow and white kernels. Intermediate resistance NCLB, common rust and Stewart's Bacterial Wilt.

<u>1/4 lb</u>	<u>1 lb</u>	<u>1 M</u>
\$9.89	\$39.58	\$13.42

Providence

82 days. TripleSweet bicolor sweet corn. Has a superb eating quality that is suited for roadside and farm markets sales. 6½' plants hold ear at 24" and have intermediate resistance to common rust. Refined 8" ears have 14 to 18 rows.

<u>1/4 lb</u>	<u>1 lb</u>	<u>1 M</u>
\$10.14	\$40.54	\$12.57

Kickoff XR Cor

69 days. Flavorful first-early super sweet (sh2). Excellent seeding vigor. New benchmark for flavor in this maturity slot. Exceptional quality. Large, attractive ears 7¾ - 8". Excellent husk package and tip fill. High resistance to common rust.

<u>1/4 lb</u>	<u>1 lb</u>	<u>1 M</u>
\$10.19	\$40.77	\$15.50

Xtra Tender 274

74 days. This Xtra-Tender bicolor sweet corn offers superb eating quality and tenderness. Very refined 8" ears are produced on sturdy plants with few tillers and have 18 to 20 rows of nicely contrasted yellow and white kernels. A dark green husk with a long dark green flags cover the very tender and very sweet kernels well over the tip. Isolation required.

<u>1/4 lb</u>	<u>1 lb</u>	<u>1 M</u>
\$11.88	\$37.38	\$14.50

**Special Bulk Prices
are Available**

White/Yellow/Ornamental Corn Seeds

PRICES MAY CHANGE WITHOUT NOTICE DUE TO COST AND AVAILABILITY.

Delectable

84 days. This rigged plant is tolerant to Stewart's Wilt and common rust. It produces large, 8½ to 9" ears very well filled with 18 to 20 rows of delicate, deep yellow and white kernels. Plant it later for fall corn roasts. The large, fancy ears of Delectable are hard to beat.

<u>1/4 lb</u>	<u>1 lb</u>
\$10.58	\$21.16

Café Yellow Corn

68 days. Café's 7 1/2-8" ears are stuffed with 14 rows of sunny yellow, tender kernels that are brimming with height-of-the-season, sweet flavor. It also handles cooler soil temperatures better than other synergistic varieties.

<u>1/4 lb</u>	<u>1 lb</u>	<u>1 M</u>
\$9.15	\$36.50	\$14.35

Silver King

82 days. Plant produces good yields of delicious sweet white corn. Ears are 8" long and have 16 rows of white kernels. Disease Resistant: Stewart's Wilt, Northern Corn Leaf Blight, Common Rust. Plants. Requires warm (65°F/18°C) soil to germinate properly.

<u>1/4 lb</u>	<u>1 lb</u>
\$11.16	\$22.32

Fiesta CORN ORNAMENTAL

100 days. Bright and showy. A must for your autumn decorations. Multicolored ornamental corn. Husk color ranges from light green to deep purple. Note: isolate ornamental corn from other corn to prevent cross pollination.

<u>1/4 lb</u>	<u>1 lb</u>
\$8.83	\$17.66

Bodacious

75 days. Very high quality flavor and sweetness that holds for days after picking. Its wide adaptability in northern latitudes, early maturity and consistent performance has made it the most popular variety in its class.

<u>1/4 lb</u>	<u>1 lb</u>
\$10.55	\$21.10

**Special Bulk Prices
are Available**

Top Pop

100 days. The vigorous, upright plants of this hybrid produce big crops of good sized yellow ears. Its deep kernels pop to large sunbursts that are tender and delicious.

<u>1/4 lb</u>	<u>1 lb</u>	<u>1 M</u>
\$5.74	\$22.96	\$5.50

**Special Bulk Prices
are Available**

WILDAS PRIDE CORN ORNAMENTAL

110 days. Never have we seen such a wide diversity of color in one variety. Tall sturdy plants produce 8-11" ears ranging from yellow and white, deep maroon red, solid yellow, black-red, and a wide assortment of multicolored ears.

<u>1/4 lb</u>	<u>1 lb</u>
\$7.25	\$28.75

Plants – Not Just Seeds

Minimum order for plants is by crate or box, which is 500 to 750 plants

Seeds are purchased 15% over the required amount.

Example: A 1,000-plant order would need 1,150 seeds purchased.

1st Shipment:

Order by March 15th Arrival May 20th

2nd Shipment:

Order by April 15th Arrival June 20th

Some of the varieties that are ordered are:

Mountain Fresh, Pony Express, and Celebrity Tomatoes
King Arthur, Declarations Peppers
Epic Eggplants
Athena and Aphrodite Melons

If we can get the seed, we can get you the plants.

Prices are determined at the time of order.

Onions

PRICES MAY CHANGE WITHOUT NOTICE DUE TO COST AND AVAILABILITY.

Texas Supersweet

Yellow, globe shaped. The perfect onion to add to your garden. They have an off-white flesh and are very sweet and flavorful. Known for its great flavor and large size, disease resistant.
Storage: Approx. 2 - 3 months

Texas Early White

White, globe-shaped. If you want a white onion that has a great reputation for ease of growing, flavor, and disease resistant.
Storage: Approx. 2 months

The Texas Legend

Yellow, globe-shaped, sweet. Matures 10 to 14 days earlier than the Texas Supersweet. Revered for its uniformity. Specifically bred for more healthful benefits.
Storage: Approx. 3 - 4 months

Yellow Granex

Yellow, semi-flat, sweet, hybrid. They will be the sweetest variety in your garden! This variety was approved through vigorous testing to be allowed to be called a Vidalia onion.
Storage: Approx. 1 month

Candy

Our most popular variety! Yellow, globe-shaped, sweet, hybrid. The most popular and recommended variety we offer! This onion is great for anyone that has never had much success growing onions.
Storage: Approx. 3 months

Red Candy Apple

Deep red, flattened globe shape, sweet, hybrid. A reliable red intermediate day onion year after year.
Storage: Approx. 2 - 3 months

Highlander

Yellow, slightly flat globe shaped, sweet, hybrid. This is the main variety planted by large onion farmers in the Northeastern United States for early marketing.
Storage: Approx. 4 - 5 months

Walla Walla

Yellow, semi-flat, sweet. A customer favorite for years for its flavor and ease in growing. This is one of our best selling long day onions.
Storage: Approx. 1 month

Yellow Spanish

Yellow, globe shaped, mild. They grow quickly without much effort. This is the favorite onion grown by commercial growers in northern states because it makes uniformly large, sweet bulbs.
Storage: Approx. 4 months

Red Wing

Red, globe shaped, slightly pungent, hybrid. Simply the best long day red onion grown in the Northern areas. Deep internal red color continues to develop during storage.
Storage: Approx. 8 - 10 months

Ringmaster

White, globe shaped, mild. Has large bulbs with firm white rings surrounding a single center. The sweet and mild with its large, dark green tops is also a favorite for green onions.
Storage: Approx. 4 months

Roughly 50-65 plants per bundle.

Strawberries

AC Wendy = 1

The Kentville Research Station in Nova Scotia developed this early-season variety. The berries are wedge-shaped to conic with firm, bright, red-colored flesh. Wendy has an excellent fresh flavor. This early season variety's attractive, high-quality berries maintain their large size through several pickings. makes this variety a good choice for commercial and home use.

Darselect = 2

It is a highly productive, widely adapted variety for plasticulture or matted row production. Darselect is rated as good to excellent for size, color, appearance, and plant vigor. Its sweet, tasty fruit was rated very good for flavor and firmness. It has shown some susceptibility to leaf diseases. Darselect requires good amounts of nitrogen, and appropriate amounts of magnesium and potassium during fruit growth to enhance its performance.

Galletta = 2

It ripens early in the season and produces large sized berries. Attractive, glossy fruit has an excellent flavor. Galletta is highly productive and holds fruit size well throughout the season. The plant is vigorous and shows tolerance to foliage diseases. It has tolerance to red stele disease. This is a variety that will grow in heavy soil.

Jewel = 3

A top mid-season variety, recommended for commercial growers and home gardeners. Jewel has large berries with superb quality and flavor. Jewel performs well over a wide range of growing conditions. Care must be taken at renovation to maintain a good plant stand.

Earliglow = 3

"Wonderful strawberry flavor" is this variety's trademark. Earliglow fruit has a very firm, glossy skin, medium firm flesh, and medium size. Its sweet flavor makes the variety excellent for fresh eating and freezing. Fruit size decreases as the season progresses. Earliglow plants are very vigorous. This variety has good resistance to red stele and intermediate resistance to Verticillium wilt.

Flavorfest = 1

It is a mid-season variety, adapted to both plasticulture and matted row production. Fruits are an attractive bright red color with an excellent flavor profile. Berries are large and hold their size throughout the season. Plants are vigorous and show excellent disease resistance to red stele and leaf diseases. Flavorfest will also be a good alternative for organic producers and in conditions where good plant vigor is required.

Honeoye = 1

It has been a top variety for over 30 years. It combines winter hardiness, high productivity, good appearance, and color, with an excellent, firm, large-sized berry. The large berries are easy to pick and produce high yields over the long fruiting season, making it our most consistent berry producer. Optimum flavor is produced by growing this variety in medium to light soil. It's a vigorous plant with no soil disease resistance.

Dickens = 1

Produces large, firm fruit that ripens in late mid-season starting at the end of the Jewel season and continuing for 10 days after Jewel. The fruit has a short conic shape and produces multiple fruiting laterals. This variety fruits to a good, sweet flavor with a bright red skin color and red interior. Productivity has been very good in trials exceeding Jewel and Winona, with larger average fruit size. In trials in Ontario, Dickens showed good Phytophthora root rot resistance in replant sites and good vigor through renovation.

Yambu = 1

It is an early mid-season variety, ripening similar season to Honeoye, one of its parents. Plants are very vigorous with dark green color, and we have not experienced foliage disease pressure to this point. Yambu has no special nutrient requirements. Fruits are bright red color, attractive, with uniform shape and glossy skin. Yambu fruits for a long season and have shown to be very productive.

Cabot = 2

It is known for its huge berries, excellent flavor, winter hardiness and disease resistance. It is by far the best tasting big berry ever! Results indicate Cabot is best adapted for northern locations and where very large fruit size is required. First fruits may split or be rough. Plants are vigorous but may not run freely, indicating closer spacing may be required.

1 = Patented

2 = Un-Patented

3 = Open

Strawberries

Cavendish = 2

It is the result of a cross between two varieties known for their winter hardiness and attractive, large fruit. It produces high yields that ripen over a long growing season. Excellent flavor and overall quality of the fruit. Cavendish is highly resistant to red stele and has some resistance to Verticillium wilt.

AC Valley Sunset* = 1

A late-season variety that will ripen 5-7 days later than Cabot. Plants show good vigor with no apparent foliage disease concerns. Berries are lighter red, shiny and large-sized. The flavor and yield are very good. With its softer skin, fruit is best suited for local, fresh markets to extend the season.

Evie-2 = 3

Commercial growers will want to plant this variety. This day-neutral is easier to grow, higher yielding and less sensitive to the warm summer temperatures that shut down day-neutral production in the East and Midwest. Berries have an attractive red color, good flavor and maintain good size. In fruiting trials, Evie-2 produced the largest spring crop of any day-neutral variety we have tested to date.

Albion = 1

Produces very large fruit that is mostly conical, very firm, and red in color. Its flavor is very good for a day neutral. To get the high yields it can produce, this variety will need a stronger watering and nutrient program than any other everbearer. Wider plant spacing will deliver the largest berries.

Malwina* = 1

It is of high quality, very late season variety. Fruits are glossy, and dark red; has an excellent flavor with high Brix readings. Berries are large and hold berry sizes well throughout the season. Regular pickings are suggested to maintain fruit firmness. With its very vigorous growth habit, nitrogen fertilizer needs to be managed to avoid excessive vegetative growth. Malwina shows resistance to mildew and tolerance to Verticillium wilt and red stele. Malwina is an excellent variety to extend the strawberry season.

Seascape = 1

This day-neutral has been highly successful for northeastern growers for summer and fall production. The plants have the potential to be the most productive of any day neutral. The berries are large, firm and have good flavor when picked ripe from the plant. Seascape is considered by our customers to have the best flavor of any of our everbearer.

Blueberries

PRICES MAY CHANGE WITHOUT NOTICE DUE TO COST AND AVAILABILITY.

Reka

Reka Blueberry is one of the fastest growing and most adaptable varieties we have seen. A very vigorous variety, it grows well in light sandy soils, peat and heavier clay loams and is more tolerant to wetter ground than many other varieties. Fruit is an attractive dark-blue color and the plant produces large crops. Its winter hardiness is rated equivalent to Bluecrop.

Berry Size: Large *Firmness:* Firm
Flavor: Excellent *Winter Hardy:* Good

Duke

Duke blueberry is an early-season variety and is extremely popular in the Mid-Atlantic region. It is high-yielding and hardy. The attractive fruit is medium to large, light blue, and slightly tart. Berries maintain their uniform quality better than most other varieties. Duke grows upright to a height of 4–6 feet.

Berry Size: Medium *Firmness:* Very
Flavor: Excellent *Winter Hardy:* Good

Bluecrop

The leading commercial blueberry variety grown. It produces high yields of large, bright blue berries that are firm and grow in large clusters. The berry flavor is superb, fresh or frozen. Bluecrop is known for its hardiness, vigor and consistent production. The plant grows to a height of 4 to 6 feet.

Berry Size: Large *Firmness:* Firm
Flavor: Excellent *Winter Hardy:* Good

Patriot

Patriot is an early variety released by the University of Maine, where growing seasons are short and winter hardiness is a must. This variety is vigorous and grows upright to a height of 4–6 feet. Patriot adapts to many different soil types and has performed better in heavier soil than some other varieties. The fruit is large and has very good flavor.

Berry Size: Large *Firmness:* Moderate
Flavor: Excellent *Winter Hardy:* Excellent

Chandler

Chandler is a mid to late season blueberry plant with the largest berry of any available variety on the market today. Chandler will fruit over a period of 4–6 weeks and has very nice flavor. This variety is vigorous, with a spreading habit of 5–6 feet. Chandler is probably not hardy enough for the more northern areas but should do well in zones 5–7.

Berry Size: Very Large *Firmness:* Moderate
Flavor: Excellent *Winter Hardy:* Good

Blueray

Blueray is an early-midseason blueberry variety that ripens a few days before Bluecrop. The large, dark-blue berries, with sweet, high-quality flavor, make Blueray an excellent choice for the home gardener. The bush is vigorous, productive, and winter-hardy. It grows to a height of 4–6 feet. Blueray is widely planted throughout the Northeast and Midwest.

Berry Size: Large *Firmness:* Firm
Flavor: Excellent *Winter Hardy:* Excellent

Jersey

Jersey blueberry is a late-season variety that is easy to grow, high-yielding, and one of the oldest and most widely grown blueberry varieties. The berries are dark blue, medium in size, and very sweet. A tall and well-shaped bush, it has excellent ornamental value.

Berry Size: Medium *Firmness:* Firm
Flavor: Excellent *Winter Hardy:* Excellent

Elliot

Elliot blueberry plants are very productive and grow vigorously and upright. Elliott is considered the latest of all varieties, fruiting through September. This variety is winter hardy. Berries are medium-sized, firm and have a light-blue color. Fruit needs to be picked fully ripe for best taste. This variety is a good choice for extending the growing season.

Berry Size: Medium *Firmness:* Firm
Flavor: Good *Winter Hardy:* Good

Blueberries

\$18.80 per individual. Discount after 10 plants.

Last date to order is **April 15**. Orders will still be accepted, but after that date the amounts and varieties cannot be guaranteed. Available week ending **May 8**. Date is subject to change based on weather conditions.

* 2 different types are needed for pollination.

Blackberries

Chester

Considered one of the more winter hardy and productive thornless varieties available, produces large, high-quality fruit that ripens in early to mid-August. Fruit has good flavor and does not soften or lose its shiny black color in hot weather. Chester plants are vigorous and show resistance to cane blight.

Berry Size: Large

Firmness: Firm

Flavor: Excellent

Triple Crown

The plant is semi-erect and thornless and bears large, flavorful fruit. Early trials indicate that it may ripen earlier than Chester and is similar to Chester in winter hardiness. Triple Crown would be a good choice to help extend the blackberry season for home gardeners.

Berry Size: Large

Firmness: Moderate

Flavor: Excellent

Blackberries

\$59.95 per bundle (5 plants per bundle) Come in 32 liner size.

Last date to order is **April 15**. Orders will still be accepted, but after that date the amounts and varieties cannot be guaranteed. Available week ending **May 8**.

Raspberries

PRICES MAY CHANGE WITHOUT NOTICE DUE TO COST AND AVAILABILITY.

Himbo Top®

This variety produces extremely large, firm, bright red fruit that does not darken. Berries have good flavor, are conic shaped, have small, well-constructed drupelets and are easy to pick. This variety is extremely vigorous and will require less fertilizer. We feel it has the potential to be the most productive of any variety we offer today.

Berry Size: Very Large *Firmness:* Firm
Flavor: Good \$55.00 per bundle

Jewel

Jewel is our most popular black raspberry variety. It produces excellent yields of superb quality berries. The fruit is glossy black in color, a large size, and has a rich raspberry flavor. It is an excellent choice for use in jams and jellies. Jewel is winter hardy and a very reliable choice.

Berry Size: Large *Firmness:* Firm
Flavor: Good \$58.33 per bundle

Prelude

Prelude is identified as the earliest ripening summer red raspberry, ripening in mid-June under NY conditions. Although Prelude is also fall-bearing, it produces the biggest portion of its crop in the spring. Very winter hardy and vigorous, Prelude berries are round-conic, coherent, with very good flavor. An excellent choice when early fruit and quality are required.

Berry Size: Medium/Large *Firmness:* Firm
Flavor: Excellent \$55.00 per bundle

Encore

Encore is vigorous, sturdy, upright, nearly spineless and has excellent winter hardiness. Berries are large with very cohesive drupelets and good raspberry flavor. Encore is a good choice for extending the summer raspberry-picking season and offers high yields required by commercial growers.

Berry Color: Red *Berry Size:* Large
Firmness: Firm *Flavor:* Good
Winter Hardy: Excellent \$55.00 per bundle

Polana

Polana allows you to grow fall varieties in more northern locations and still produce a great crop. Its berries are highly productive, large, glossy in appearance, coherent, with good flavor. Canes are vigorous and grow shorter than those of Heritage. Ripens early August in southern New England. A great choice for early fall raspberries. Polana needs extra fertilizer in May and June.

Berry Size: Medium/Large *Firmness:* Moderate
Flavor: Good \$55.00 per bundle

Joan J

This high-yielding, thornless, early primocane raspberry variety the fruit is large and holds its size well. Berries are firm, easy picking (they release well) with small drupelets and good flavor. The fruit will hold and ship well, as it is dry. Highly recommended for planting when early fruit is required.

Berry Color: Red *Berry Size:* Large
Firmness: Firm *Flavor:* Excellent
Winter Hardy: Good \$55.00 per bundle

Anne

Anne has special characteristics. Anne is a large-fruited fall bearer that ripens at the same time as Heritage. Fruit holds a pale yellow color and is proving to be highly productive. Anne's excellent size, appearance, and very sweet flavor make it an excellent choice for a yellow fall bearer.

Berry Size: Large *Firmness:* Firm
Flavor: Excellent \$55.00 per bundle

**Raspberries: 5 per bundle

Asparagus

Purple Passion Asparagus

Purple Passion is a unique asparagus variety especially suited to the asparagus enthusiast, whether home gardener or commercial grower. Its special, attractive purple color, flavor and tenderness distinguish this variety from others.

\$24.50 per bundle

Millennium Asparagus

Millennium has been productive, with high quality spears, tender, and has good flavor. Thought to be best adapted to heavier soils, but results from our grower survey indicate success with a wide range of soil types. We recommend trials under your conditions to assess its performance.

\$26.50 per bundle

Mary Washington

This winter hardy variety is also heat tolerant and shows resistance to rust.

This is an heirloom variety!

\$22.55 per bundle

Rhubarb

MacDonald Rhubarb

This very vigorous, upright growing strain produces large, tender stalks and has acceptable red color. Shows resistance to root-rot problems.

Cawood Rhubarb

It has a stout growth habit that will excel in northern areas, has deeper red color and slightly thicker stalks.

It may struggle in areas with long periods of high heat. We have had a lot of positive feedback on this variety from commercial growers and home gardeners.

\$15.50 per Root Knot

Horseradish

Big Top Horseradish

Big Top for its size, vigor, wide adaptability and resistance to foliage diseases, rust and bacterial spot

(all common problems in horseradish). These horseradish plants are top performers; a few roots will last a lifetime!

\$26.75 per bundle

5 per bundle

Asparagus, Rhubarb, Horseradish:

Pricing is per variety & per shipment; varieties cannot be combined for quantity pricing. Discounts after 25, and 40 bundles. Amounts and Varieties cannot be guaranteed. Available week ending **May 8**.

Date is subject to change based on weather conditions.

Planting Asparagus Crowns

Most people will turn to planting asparagus crowns when considering how to make an asparagus bed. Planting crowns will establish your asparagus bed faster so that you can harvest the asparagus sooner.

When the asparagus arrives, it will be dry looking. Soak it in tepid water for two to three hours before you're ready to plant. Asparagus planting instructions recommend that you plant the crowns 8 to 12 inches apart. Cover with about 2 inches of soil. Water the bed well after planting asparagus crowns. Be sure to provide sufficient water until the crowns show sprouts.

Sweet Potato

PRICES MAY CHANGE WITHOUT NOTICE DUE TO COST AND AVAILABILITY.

Beauregard

90-100 Days. Green heart-shaped leaves, blooms prolific rose-colored skin and orange flesh. Very good yields, resistance to white grub, soil pox. Susceptible to root-knot, nematodes; bacterial soft rot; slow sprouting. Stores well, high % No. 1 roots.

\$16.00 per Bundle/25 per Bundle

O'Henry Sweet Potato

90-100 Days (white). The O'Henry Sweet Potato has a pale copper skin, almost like a potato, but don't be fooled. This tater's white flesh is sweet, creamy and ideal for soups and stews. Has a different look from the other darker-skinned sweet potatoes.

\$16.00 per Bundle/25 per Bundle

Murasaki

Murasaki sweet potatoes are medium to large in size and are elongated, somewhat bulbous, and oblong in shape with each end tapering to a point or rounded edge. The thin skin ranges in color from dark purple to burgundy depending on the growing environment, and there are faint light pink-purple patches and brown spots scattered across the surface. The flesh is white to pale yellow and is a bit drier than other varieties, offering a flaky texture. When cooked, Murasaki sweet potatoes have a slightly sweet taste with a robust nutty flavor.

\$16.00 per Bundle/25 per Bundle

Covington Sweet Potato

100 Days. A favorite for mashing or roasting, the Covington Sweet Potato has rose-colored skin and supersweet orange flesh. Smooth Orange, very good yield. Resistance to Russet Crack, Southern Root Knot, Nematode.

\$16.50 per Bundle/25 per Bundle

Bonita Sweet Potato

90-100 Days (white). Light tan skin with a pink cast at harvest; fades to tan in storage. Flesh color is white with a tinge of yellow. Uniform shapes with good yields of #1's.

\$16.00 per Bundle/25 per Bundle

Purple Majesty Sweet Potato Plant

100 Days (purple). It has a striking purple exterior and interior. These sweet potatoes have a high nutritional value and are rich in anthocyanin and antioxidants. The color is retained after cooking.

\$17.00 per Bundle/25 per Bundle

Orders are taken starting the **end of March to May 15** for delivery during the first or **second week of June.** Varieties cannot be guaranteed after **May 15.**

Garlic and Shallot Varieties

German White Garlic

This is a very sturdy porcelain type of hardneck garlic. They grow fairly large and have an excellent strong flavor that becomes sweet and mild when cooked. The outer bulb wrappers are often very white to milky and light tan. The scapes they produce in the spring coil in all kinds of ways all straighten up and become vertical.

\$18.70 per lb.

German Red Garlic

This is a beautiful hardneck garlic from the rocambole family of garlics. There are 6 to 9 good-sized cloves situated around the central stem. The color of the skin on the cloves is usually a brilliant red and it has a hot and spicy flavor not to be missed. Many people consider them their favorite garlics because of their very rich taste. The scapes are thick and flavorful, often making 2 to 3 curls before turning up.

\$18.70 per lb.

Polish White Softneck

A great garlic for braiding. This is a traditional favorite with New York's Italian market gardeners. The skin has a purple blush. It is said to be substantially more winter-hardy and more productive and disease resistant in the North and East. Average 6 cloves per bulb.

\$17.75 per lb.

Bavarian

Bavarian is a hardneck garlic in the Rocambole family. Bavarian is a strong garlic with a hot bite when raw that produces large dark purple skinned cloves. We really love the flavor of this one; the heat mellows a bit with cooking but still provides a great garlic presence and a little zing. It is a winter hardy variety suited well for cold climates. Stores up to 6 months.

\$18.70 per lb.

Music Garlic

Limited. Good flavor, sweet and pungent, very hot when eaten raw. A very consistent performer here in the colder areas with large bulbs and typically 4 to 6 cloves with a pinkish blush to the skin. Mildly hot, easy to peel. Plants are vigorous and tall with large scapes.

\$18.70 per lb.

Elephant Garlic

Late Season. These huge cloves produce softball-sized heads. The flavor is mild and suitable for many recipes. The truly impressive plants easily reach 4 to 5 feet and the flowers dry nicely for arrangements. Remove the flower head to promote larger clove size.

\$18.70 per lb.

French Shallots

French production of Jersey 'half long' types with long, rather than rounded, bulbs that are often referred to as 'banana' shallots. The shiny copper-skinned bulbs with crisp, pink-tinged flesh make this a favorite with exhibitors. Is equally popular in the kitchen for its superb sweet taste. An excellent variety for Autumn planting with good storage potential.

\$15.85 per lb.

Orders are taken starting the **end of June to September 15** for delivery during the first or **second week of October**. Varieties cannot be guaranteed after **September 15**.

PerCarb®

Broad-Spectrum Fungicide, Bactericide

PerCarb is an EPA-registered contact foliar fungicide/bactericide with residual activity designed to treat and control foliar plant pathogenic diseases and liverwort on soil surfaces.

ACTIVE INGREDIENTS:

Sodium Carbonate Peroxyhydrate*	85.00%
OTHER INGREDIENTS.....	15.00%
TOTAL.....	100.00%

*Contains 27.60% Hydrogen Peroxide by weight

KEY FEATURES & BENEFITS

- 1-hour REI sprays, 0-hour REI non-sprays
- PHI: zero days to harvest
- Contact activity with residual control
- Flexible application timing: dormant and in-season

SOIL SURFACES WITH GROWING PLANTS

Apply PerCarb to soil surfaces for the prevention and control of algae, nostoc algae, bacteria, moss, liverworts, slime molds and their spores.

APPLICATION RATES

Type	Rates/Notes
Indoor Production	Prepare a solution by mixing 1.5–4.8 oz. (3–10 tbsp.) of PerCarb per 10 gallons of water (1–3 lbs. per 100 gallons of water). Good coverage and wetting of the foliage are necessary and required.
Outdoor Production	Prepare a solution by mixing 1–3 lbs. of PerCarb per 100 gallons of water. Good coverage and wetting of the foliage are necessary and required
Soil Surface Treatments	Preventative Treatments: Mix ¼ lb. of PerCarb per gallon of water, spray at a rate of three gallons per 1,000 sq. ft. of plant area. For Curative Treatments: Mix ½ lb. of PerCarb per gallon of water.

APPLICATION NOTES

- For effective results, use enough volume of spray solution to obtain complete and uniform coverage.
- When applicable, apply in early and late dormancy prior to bud break. Do not apply to blooming crops.
- Use spray solutions within two hours of preparation. Do not store and reuse.
- Do not apply through any irrigation system.
- Do not use with metal-based products, either in a tank-mix or in back-to-back field applications.

Discover OxiDate® 5.0

Broad-Spectrum Fungicide & Bactericide

Control Plant Pathogens

OxiDate 5.0 is an EPA-registered fungicide/bactericide and functions by eradicating plant pathogens on the plant surface upon contact. OxiDate 5.0 is flexible to use in conventional or organic disease control programs.

Strengthen Your Spray Programs

OxiDate 5.0 can be used in every spray for minimizing disease pressure, eliminating resistant pathogens, and improving tank-mix partner longevity.

- REI: zero hours (sprays have dried)
- PHI: zero days
- On-contact activity
- No residue, MRL exempt
- Ideal for IPM programs; no known resistance
- Tank-mix compatible

pint and ½ pint carriers

Farmstand Products

large selection of rubber bands
(sizes 19 to 64)
cauliflower bands
several sizes of paper bags, plastic bags
t-shirt bags
15" produce bags
20" produce bags

Apple Bags

¼ Peck Paper Apple bags
½ Peck Paper Apple bags
1 Peck Paper Apple bags
½ Bu. Paper Apple bags
½ Peck Plastic Apple bags
¼ Peck Plastic Apple bags

Directions to the Long Island Cauliflower Association.

DIRECTIONS: From the Long Island Expressway

Take L.I.E. to Exit 72- bear right onto Rte. 25 East – continue for approximately 3 miles. You will pass the rear entrance to Tanger Outlet Mall. There will be a Dodge Dealership, followed by a gas station and then a large yellow building all on the left. Just past that building make a left onto Marcy Ave. We are the second driveway on the left, before the Railroad Tracks.

DIRECTIONS: From the South fork

Take Flanders Road (Rte. 24) to Riverhead Traffic Circle. Continue on Rte. 24, take the next right to West Main Street. You will see the Riverhead Library, make a left turn heading west on West Main Street, make a right turn at the second right, Marcy Ave. We are the second driveway on the left before the Railroad Tracks.

DIRECTIONS: From the North fork

Take Rte. 25 to Rte. 58 in Riverhead or Take Rte. 48 west to Sound Ave. to Northville Turnpike, make left head south to Rte.58 in Riverhead Continue west on Rte. 58 to the traffic light at Osbourne Ave. Make a left turn go 3 blocks to Marcy Ave. make a right turn. Continue for about ½ mile to Stop sign at Pulaski Street, stay on Marcy Ave. our driveway is on the right just after the Railroad Tracks.

Once again thank you for your continued patronage.
